

Circular – Safe Hoverboard Charging Requirements

Dear Exhibitors,

Since recently serious safety concerns have been raised by hoverboards, some of which have caught fire either while charging or being ridden, therefore, please note below **Safe Hoverboard Charging Requirements** in order to prevent hoverboard from bursting into flames:

- 1. Charging hoverboard overnight at fairground is strictly prohibited**
- 2. Do not overcharge**
- 3. Do not leave hoverboard unattended when it's charging**
- 4. Do not use third-party chargers**

Should there be any accident caused by the violation of above requirements, HKTDC will reserve the right to pursue the matter in a court of law.

Should you have any enquiries, please contact Mr Haydn Tang (email: haydn.hk.tang@hktdc.org; Tel: 22404471).
